## "GODMACHINE"

Treatment – 11/19/2012

In the not so distant future, the United States Congress votes to allow corporations to own U.S. states, giving rise to the second American Civil War. With help from their shareholders in China, corporations soon form their own armies, overpowering those states that choose to rebel. Known collectively as the *Chinamerica Corp*, the new corporate states establish a technological iron curtain over their former constituents.

Unbeknownst to them, a former NASA scientist and reclusive hacker known as the "OMEGA MAN" unleashes the most powerful computer virus ever created -- the *Khodamaha*. The virus quickly infects the networks of the Chinamerica Corp, forcing them to cease all offensive operations.

The Khodamaha also has another distinction as the first computer virus in history able to make the leap from computer to human body using implant technology. One of the infected is JOHN LEE, a sergeant in the elite "Black Dragons," a corporate-run paramilitary organization. The virus infects him via his neural implants, driving him mad in the process. But all is not what it seems.

Through a strange twist of fate he meets GRACE, a "comfort model" working in an all-android brothel. She too is infected by the Khodamaha, a condition punishable by death for both. The virus, however, has given Grace a special gift -- the ability to sing the frequency of the Big Bang. By interfacing with her singing software, the virus allows Grace to essentially "tune-in" to the very laws that govern the cosmos. Her singing acts as string theory in action, allowing her to attain sentience as well as giving her the power to heal. This allows her to "reboot" John's unconscious, purging him of the PTSD afflicting him and giving them both a second chance at life.

Their secret is discovered and Grace and John are forced to flee into the "Forbidden Zone," a quarantined area in which all technology is outlawed to prevent the spread of the virus. Inside this zone they come upon stragglers and miscreants living off the grid in their wild surroundings. It isn't long before they discover the Omega Man hiding out in his remote mountain lair. Unaware of the full implications of his creation, a distraught Omega Man is planning on releasing Khodamaha 2.0 with the hope that it will annihilate all forms of technology once and for all.

When the Omega Man discovers Grace's ability to heal both human and machine alike, he has a change of heart and orders Grace and John to attack the Chinamerica Corp with the help of resistance forces. Together they unleash the Khodamaha into Chinamerica Corp's networks, their love acting as a union between man and machine that not only reboots the entire world's computers, but the collective psyche of the human race as well. Together they usher in an unprecedented new era of enlightenment, ending the reign of the Chinamerica Corp and its technological stranglehold over all life on earth.
